August 2019

Dear Community Members,

You may or may not have heard that a “hole” opened up at our school. The hole was discovered on August 8th and was located near our playground area. The area was immediately sectioned off and inspected. It was determined that the hole was caused by a manmade catch basin collapsing on itself. The catch basin was from a house that use to be located on that side of our School property, but was taken down years ago.

Given this information, the catch basin was cleaned out and filled in by our friendly neighbors, the Township. We are confident of the cause of this isolated issue and do not foresee an ongoing or future concern. As always, thank you for your support!

Sincerely,

William Thompson
