September 3, 2018

Dear Parents & Faculty,

Fungus was found in three classrooms and one closet at White Township School during the last week of August. To proceed in a cautious manner, RK Environmental was contacted immediately, and they visited our school and assessed the situation. After a thorough building inspection, fungus was found in two additional classrooms.

To date, two of the rooms and the one closet have been professionally cleaned, and we have received the air test results clearing these locations for the safe return of students and staff. The remaining three classrooms have been professionally cleaned as well, but the results indicated additional work was required. The work has been completed and these three rooms were retested today. We are anticipating the results by Wednesday or Thursday of this week.

To proceed in a cautious manner, students and staff will not be able to return to these three classrooms (Mrs. Evans, Mrs. Laubach, and Miss Barofski) until we receive satisfactory results for these locations. Until that time, Mrs. Evans' 7th grade ELA class will meet in Mr. Hutchison's classroom. Mrs. Laubach's 1st grade class will utilize Mrs. Schaarschmidt's kindergarten classroom and Miss Barofski's class will use Mrs. Gerhardt's former 1st grade classroom.

Please know RK Environmental is actively monitoring this situation in an ongoing fashion, and with their professional guidance we are taking all appropriate precautionary measures necessary to provide our school community with a safe and healthy environment. As always, I thank you in advance for your understanding as we work through this situation. I look forward to the start of the 2018-2019 school year.

Sincerely

William Thompson
Chief School Administrator
