Fax: 908 – 475 – 3627

Dear Parents,

September 2020

Welcome to White Township School Health Office. I wanted to give you some information that will help your child adjust to school and have a healthy and successful school year.

Breakfast is the most important meal of the day. Just as gas is fuel to a car, breakfast is fuel to your child. Research has shown that children, who eat a breakfast with protein, perform better in school than those who do not. Protein should be a part of every breakfast; it is in eggs, cheese, peanut butter, and milk. Carbohydrates alone, such as bread, cereal, pasta, pop tarts, and granola bars, give short bursts of energy and then stop. Protein will give a longer lasting energy level to carry your child through the morning until lunch. If you are running late in the morning, prepare something to go, such as a bagel with cheese or toast with peanut butter. Combining protein with carbohydrates will help give your child an excellent start.

Children need sleep. Elementary children need an average of 10 hours of sleep each night. Sleepy and hungry children do not have the energy to complete school work to the best of their ability.

A temperature of 100 degrees or higher is considered a fever. If your child has a fever or moderate to severe cold symptoms such as chronic cough, severe sore throat, chronic sneezing, thick nasal mucus, he/she should stay home. Children with mild cold symptoms can attend school. You can send in cough drops, along with a note to me, which I will keep in my office. Teach your child to cover his/her cough with a tissue or with his/her forearm. Hands should be washed frequently with soap and water for a minimum of 20 seconds, as long as it takes to sing the A, B, C's or Happy Birthday 2 times. Germs attach to soap and are washed down the drain. Hand sanitizers are second best and can be used and followed up with washing your hands as soon as you can. Hand washing is the single best thing you can do to keep yourself and your child healthy.

Children love to come to the health office. I cannot call you each and every time that your child may come to see me, but I will call if your child has a significant injury such as a head injury, sprain, fracture, deep cut, etc., or if he/she is ill enough to be sent home such as fever, vomiting, diarrhea, stomach ache that does not resolve, etc. Please contact me if you would like to discuss this or make special arrangements for your child.

Please call me every time your child will be absent. There are a variety of reasons, personal or health, why a child is absent, and it is helpful for me to know. Please call me and follow up with a note if your child is absent .

If your child needs medication at school, such as inhalers, Epi-pens, ADD/ADHD medications, insulin, there is a form that your doctor needs to fill out. I cannot give any medication without this. If you need a form, let me know and I can send it to you. The medication must be brought to school by an adult, along with the medication form. In NJ, it is unlawful for a child to carry medication, even over the counter medications, such as Tylenol or Advil, unless they are self-administered and a self-administered form is on file with me, which also needs to be signed by the doctor, and it is good for this school year only.

I am present in the health office during school hours and you can reach me at 908-475-4773 ext. 224 or via email at mahon@whitetwpsd.org if you have any concerns or questions regarding any of the above information, or there is anything you wish for me to know about your child specifically.

I look forward to this coming school year and meeting your child. I hope that he/she has great success and a healthy and enjoyable year.

Sincerely,

Justine Mahon, CSN, RN, BC
